

Setup and Extraction Reference

Drill & Drop Bluetooth Probe

Recommended tools for installation and extraction

Plastic Tripod

The installation tripod provides stability when drilling, ensuring a straight hole for the probe.

Tapered Auger

Tapered augers create a perfectly drilled hole for the probe, this fast method does not need a slurry.

Insertion Tool

The insertion tool comes with an easy grip to ensure flawless installation in the augured hole. The tool comes in the installation kit.

Extraction Tool

The extraction tool ensures an easy, no mess release of the probe.

Easily install your probes and access data from anywhere!

Sentek Connect

Setup, Test and Retrieve data for your Sentek Drill & Drop Bluetooth Probe.

The Sentek Drill & Drop Connect App works with Sentek Drill & Drop Bluetooth probes. The application allows you to configure, test and retrieve probe sensor data which can then be uploaded to Irrimax Live for viewing on the cloud.

Special Package Offer- Irrimax Software Subscription Payment

Connect Bluetooth Drill & Drop Probes to immediately access unlimited data using Irrimax Live.

1 Year of Irrimax Live for free, then \$140 per probe.
Pay via Pay-Pal for convenience.

Please contact Matt Nunes (see below) directly to set up your Irrimax Live account to view your data.

For more information regarding account setup and software billing contact:
