WATER SWITCH

WATERMARK Soil Moisture
Sensor and Switch

**Use
Water
Wisely**

A Simple Effective Way to Control Landscape Irrigation Water Use

Using the proven Watermark
Sensor, this simple device
"controls the controller"
so that watering is only
allowed when needed
as gauged by the soil
moisture available
in the root zone.

**For
Residential
Use in Turf
Grass with
any 24 volt
AC irrigation
controller
with sensor
(rain switch)
connections.**

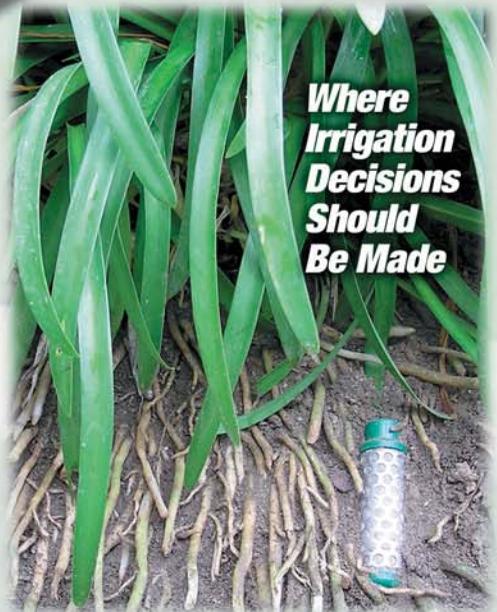

The State-of-the-Art in Irrigation Management

Simple to install on new or existing systems.
Only waters if sensing area needs water.
Four selectable moisture levels cover the range
required for most turfgrass.

- 1 **Simple to Install**
- 2 **Simple to Adjust**
- 3 **Pays For Itself in Water Savings**
- 4 **Automatically Adjusts Watering**
- 5 **No Need to Re-Program
Controller for Different Seasons**

To maximize efficiency of irrigation system, and
water savings, program controller to irrigate with
multiple start times and run times short enough
to minimize run-off. Sensor will only allow the
run times necessary.

**Where
Irrigation
Decisions
Should
Be Made**
